Afternoon Seminar: The Telescopic Over-Denture

12.30: Arrival and registration: (Buffet Lunch available)

13.30 The German Telescopic Crown – Bernd Torke, Master Dental Technician and Director of the Co-operation for Dental Comfort explains about the telescopic crown. Although largely unknown in Great Britain, this dental technology is commonly used in Germany and offers a considerable cost savings over implants and considerable performance advantages over standard dentures.

14.15 Suitable Cases for Treatment with Telescopic Over-dentures – A question and answer session examining which sorts of cases are particularly suitable for treatment with telescopic over-dentures with Reinhard Helbig, Master Dental Technician and Director of the Co-operation for Dental Comfort.

14.45 Tea / Coffee Break

15.15 Research into the Longevity of Telescopic Crowns – Michael Henninger and Claus Beckmann, Directors of The Co-operation for Dental Comfort report on recent research by Professor Hans-Juergen Wenz into the longevity and long term effectiveness of telescopic crowns.

15.45 Workshop: The Steps to Dental Comfort – An explanation of the necessary steps in preparation for treatment with telescopic over-dentures, it is anticipated that this will be in part a practical workshop involving a patient. With Karen Gangotra BDS, Senior Partner, Smile Essence, East Molesey, Surrey.

16.45 Questions and Answers / Presentation of Certificates
